VPD Government Solutions Awarded FAA Vehicle Contract

Arlington, VA -- VPD Government Solutions, a service-disabled veteran-owned small business, has been awarded a Master Ordering Agreement (MOA) for the FAA's Electronic Federal Aviation Administration Accelerated and Simplified Tasks (FAA eFAST) contract, which serves as the FAA's preferred vehicle for small business contracts.

The Blanket Purchase Agreement (BPA) contract is organized across eight functional areas, which provide MOA holders the ability to offer the FAA a range of support across engineering, business management, and systems support domains, among others. VPD's functional areas awarded on this BPA include Business Administration and Management, Computer and Information Systems Development, Computer Systems Support, and Engineering Services.

"This is a monumental accomplishment for our organization," said Tony Brooks, VPD President. "The eFAST contract vehicle gives us a unique opportunity to expand our service offerings to new markets, immediately enabling our ability to strategically grow in the areas where we can have the greatest impact."

The eFAST BPA serves to lower the barrier to entry for small businesses seeking to do business with the FAA, by leveraging a user friendly, web-based procurement tool that integrates Agency-specific standards into its workflows and procurement processes.

About VPD Government Solutions: VPD Government Solutions is a SDVOSB headquartered in Arlington, VA. VPD provides comprehensive management consulting support to clients across the federal government to include program and project management, acquisition and grant management, strategic communications, IT PMO support, and data analysis and governance.
