VPD Government Solutions Expands Contracting Opportunities with Addition of Special Item Numbers

Arlington, VA -- VPD Government Solutions, a service-disabled veteran-owned small business has added two new Special Item Numbers (SINs) to its General Services Administration (GSA) Multiple Award Schedule contract, expanding its selection of service offerings and capabilities provided to the federal government.

Designated as specific numbers that identify products and services that GSA contract holders can offer to government purchasers, SINs act as an index of capabilities that help drive the types of work a federal agency can purchase from government contractors and associated organizations. In the vast Federal marketplace, this makes it much easier for organizations to match their needs with the target organizations who provide the products and services they seek. VPD has added the following two SINs to its service catalogue: SIN 54151S – Information Technology Professional Services, and SIN 541330ENG – Engineering Services. This augments VPD's current offerings, which include SIN 541611 – Management and Financial Consulting, Acquisitions and Grants Management Support, and SIN OLM - Order Level Materials.

“We are thrilled to be adding these new SINs to our GSA contract,” said Tony Brooks, VPD President. “As we grow our footprint across the federal ecosystem, this provides us the latitude to support our government partners in the areas where they need us the most.”

Jim Burkart, VPD Vice President of Growth and Business Development, added, “This is a huge win for VPD and a strategic investment in our future. The expansion of our service offerings through these new SINs will have a direct impact on our ability to mature the company and allows us to be more responsive to the changing needs of our clients.”

About VPD Government Solutions: VPD Government Solutions is a SDVOSB headquartered in Arlington, VA. VPD provides comprehensive management consulting support to clients across the federal government to include program and project management, acquisition and grant management, strategic communications, IT PMO support, and data analysis and governance.
